

SHOP COMPETENCY EVALUATION

1. Create a checklist of things to do before entering the Physics Shop.
2. Your project deadline is approaching and your advisor is pressuring you to collect data ASAP. Anxiety and rushing create a greater chance for carelessness, which lead to disrespecting equipment, avoiding or skipping safe procedures, cutting quality corners, and potentially injury. What phrase do Navy SEALs use to remind Operators to make every action with quality and care?
3. What are the three areas of the Shop? Which equipment are you potentially allowed to use unsupervised after submitting this written evaluation?
4. From your MSU-provided, online training (Shop and Hot Work Training), name one cause of death and a relevant safety procedure for the following:

	Table Saw	Hot Work		

5. Where does equipment go at the end of the day, before you leave the Shop, or when you are finished working? What is the mentality for respecting equipment and people?
6. What is the emergency procedure for cutting off a finger?
7. Describe how you will leave the Physics Shop.
